Weight	1.3Kg	450gms
Operating Temperature	Zero to +50 degrees Celsius	Zero to +50 degrees Celsius
Dimensions (HxWxD mm)	293x46x30 inside 293x46x25 outside	165x236x55
Lock casing	Euro profile (8mm spindle)	Not Supplied

ACTpro eLock

Real time wireless networked electronic locks that can be installed within minutes on most internal wooden door types. Up to 32 locks can communicate over a wireless network with each ACTpro eLock hub.

The hub is compatible with the ACTpro 4000 and 1500 series door controllers. System configuration and administration is facilitated via ACT Enterprise PC software.

2 Year Warranty on eLock systems

Lock Features

- Up to 200,000 lock activations (CR123A Lithium battery)
- Hi-secure 128bit AES encrypted wireless communication (868MHz)
- Up to 100m range (locks to hub receiver)
- Auto discovery of locks for ease of set up
- Memory card for extra door rights
- Fire Alarm override and toggle modes
- White listed cards (Master Key access always)
- Battery voltage monitoring (at lock and PC)
- USB interface provides external power in the event of battery failure
- Door/tamper monitoring (magnetic contact required)
- Suitable for internal wooden doors (36 - 60mm wide)
- Requires Euro profile lock casing (8 mm spindle)
- Brushed stainless steel finish
- Free egress at all times via inside handle

ACTpro eLock

Hub Features

- 32 eLocks per hub (up to 100m range)
- 60,000 users
- Connects to Enterprise software over TCP/IP connection
- Signal strength monitoring
- Auto discovery of locks
- Timed actions
- POE or 12V DC supply
- Compatible with ACTpro controllers
